

BRIGHTFIELDS ECO-FRIENDLY BAMBOO BOARDS

Bamboo has gained considerable attention in sustainable design because it is a hardy, durable product from a renewable resource which helps deter harvesting of old-growth forests for wood products. There's an old Chinese saying: "First bamboo sleeps, then it creeps, then it leaps".

Brightfields Eco-friendly Bamboo boards has a beautiful, unusual grain, amplified by its warm colours. Bamboo is used as a finished structural component and is harder and more durable than most hardwoods. These boards are ideal to use for kitchen countertops, bars, cupboards, furniture and works well with other modern finishes like glass, steel and aluminium.

Dimensions:

- **Strand Woven Board** 2440mm x 600mm x 30mm
- **Horizontal Carbonated** 2440mm x 600mm x 30mm
- **Horizontal Carbonated** 2440mm x 1220mm x 20mm
- **Horizontal Carbonated** 2440mm x 1220mm x 15mm
- **Bamboo Plywood** 2440mm x 1220mm x 10mm

Bamboo boards have a high resistance to water damage, scorching and do not swell, shrink or crack. When using Brightfields' Bamboo boards, we recommend always sealing them when used in kitchens. Boards can be sealed with a polyurethane finish, traditional timber treatment products or environmentally friendly, natural oil-based products.

Brightfields Eco-friendly Bamboo boards are supplied in its natural, raw and unfinished state. They are square edged and can be cut, joined, machined and sealed to your requirements. Brightfields Bamboo Boards comply with all applicable American and EU safety and environmental standards.
